Ahmed Baruwa

Software Engineer | Python | C++ | AI/ML | Distributed Systems

Vancouver, BC +1-672-389-3029 aobaruwa@gmail.com linkedin.com/in/ahmedbaruwa https://aobaruwa.github.io

Summary

Software Engineer with 5+ years of experience building scalable software, AI-powered developer tools, and distributed systems using C++, C, Python, cloud technologies, and large production codebases.

Technical Skills

Languages: C++, C, Python, JavaScript, SQL, Swift, Shell

Backend Systems: Object-Oriented Design, Distributed Systems, REST APIs, CI/CD, Software Automation

Cloud and DevOps: Azure, Git, Docker, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy

Work Experience

Software Engineer **June 2024 – Sept 2026**

Microsoft *Redmond, WA*

- Developed an autonomous AI code-generation agent using **LLMs** to automate schema updates across 4 databases, reducing **pull request** turnaround time by **99%** - from one week to 15 minutes. (Shell, C#)
- Built and deployed a **CI/CD pipeline** for automated KQL script distribution in **Azure Data Explorer**, seamlessly migrating 50 functions across 3 production clusters. (Shell, ADX, KQL)
- Developed a Graph Neural Network **threat-detection engine** to analyze 290K+ **Azure Database** log records, achieving 97% accuracy in identifying **malicious activity**. (KQL, Spark, Python)

Data Scientist **Dec 2023 – June 2024**

Scale AI (Part-time) *Eugene,OR*

- Improved chatbot response quality using **Reinforcement Learning with Human Feedback**, reducing prompt resolution turns by 50%. (Python, SQL)
- Built a PyTorch-based 3D **image annotation** engine using GNNs, increasing labeling throughput to **100 scans/min**, enabling faster dataset processing. (PyTorch)
- Optimized an **anomaly detection** software using **k-means clustering**, reducing false positive rate by 35%. (Python, Scikit-Learn)

Data Analyst **July 2020 – Sept 2021**

Interswitch *Lagos, NG*

- Built high-throughput **ETL data pipelines** feeding real-time **analytics dashboard**, improving segmentation validation validation accuracy by 20%. (SQL, Python, Google Analytics SDK)
- Deployed interactive **SaaS reporting** modules for 21 SME clients, **driving a 16% revenue increase**. (PostgreSQL, Bash, XML, Tableau)

Data Scientist **April 2019 – June 2020**

KPMG *Lagos, Nigeria*

- Led a team of six to build an inventory reporting API, **saving 4 hours/week** in manual effort. (Utilized C++, Python)
- Optimized a financial data wrangling software **handling 10GB of data**, identifying inconsistencies, and **reducing running time by 20%**. (Pandas, Jupyter)
- Built a **speech-to-text** software to identify malicious audio, **achieving 19% word error rate**. (PyTorch, GCP)
- Mentored a **junior engineer**, fostering professional growth and supporting project execution. Enhanced productivity and achieving successful project outcomes by offering guidance on **legacy software systems**.

Education

University of Oregon **Dec 2023**

MS in Computer Science

Obafemi Awolowo University **April 2019**

BS in Electronic and Electrical Engineering
